

# 2026-2027

## (I)GCSE and Scottish National Published Subject List

### National and Independent Standardisation

#### Introduction

This is the list of subjects that are included in the 2026 value added reports and in the predictions for any students yet to reach their final (I)GCSE examinations.

These lists can change each year and are based on the most up to date information. The national standardisation includes (weighted) data from both independent and state schools. The independent standardisation includes data from independent schools only.

Please note that, as well as the standardisation you wish to use, you will need to consider the (I)GCSE type (GCSE 0-9, IGCSE 0-9, GCSE A\*-G, IGCSE A\*-G and GCSE NI) and the year group the students were in when they were assessed to establish whether a subject should appear in your reports. This is because, for every (I)GCSE subject, we look at the sample sizes for each year group separately and for some subjects we only have enough data that meet our statistical criteria at certain year groups. These include the number of students and institutions included in the data sample and the strength of the statistical correlations. As a result, it is possible that a particular (I)GCSE qualification could appear in some reports but not others.

You can find more information and guidance on using MidYIS and Yellis in our [Helpcentre](#).
