

Understanding the Question Level Report

What does this report tell me?

The BASE Question Level Report provides an overall score for each section of the assessment. It details which questions the pupil answered correctly and displays a record of the Communication and PSED responses. The Question Level Report is in a spreadsheet format. This information can be used to inform class planning and to help to identify individual learning needs.

There is a row for each pupil.

This is the number of questions the child answered correctly.

This is the total score for the matching section.

Here, we mark each question the pupil answered as right or wrong. We display the right answers in green and the wrong answers in red.

A label to help identify each question appears at the top of each column.

TOP TIP: Always use your BASE assessment information in conjunction with your own observations and judgements.
